SUMMARY

Passionate and innovative Computer Science Engineer with a strong foundation in mobile application development and a flair for technology. Adept at creative problem-solving, with extensive expertise in building robust applications, integrating APIs, and collaborating with cross-functional teams. Proven track record of self learning and mastering diverse programming domains, ensuring adaptability in the ever-evolving tech landscape. Skilled in analyzing complex problems and crafting impactful, cutting-edge solutions.

EDUCATION

Anna University, Chennai, India   2020 - 2024

Bachelor of Engineering, Computer Science & Engineering

HSE (Class XII), NSS Higher Secondary School, Alappuzha, Kerala   2018 - 2020

EXPERIENCE

Mobile Application Developer   May 2022 - Present
Freelancer   *Kochi, India*

- Developed a robust mobile application serves as a convenient platform for hiring reliable manpower for various domestic services, ensuring ease of use, efficiency, satisfaction for both users and service providers.
- Developed a simple yet powerful live streaming application, which enables users to watch live sports events seamlessly leveraging the Media3 ExoPlayer to deliver high-quality, real-time streaming content
- Designed and developed an application aimed at facilitating seamless communication and organization for learners and instructors.

PROJECTS

Encore: Kotlin Multiplatform application designed to provide a seamless music streaming experience similar to Spotify. The app allows users to discover, stream, and organize music across multiple platforms, leveraging the power of Kotlin Multiplatform to deliver a consistent user experience. (Github Link)

Insta Movies: IMDB-like application that supports various screen types, providing users with comprehensive information about movies, TV shows, and actors. The app fetches data from The Movie Database (TMDb) API to offer up-to-date details, reviews, and ratings. (Github Link)

Contacts: Sample contacts list application designed for both iOS and Android platforms. The app allows users to manage their contacts, including viewing, adding, editing, and deleting contacts with photos. It showcases cross-platform development using Kotlin Multiplatform and provides a clean and intuitive user interface. (Github Link)
